Onderwerp: Fwd: PERSBERICHT + UITNODIGING: expedition "Beautiful World, sustainable social from 024 to K2"

Beste,

Op 12 juni 14.00u start mijn [expeditie "Beautiful World, sustainable social from 024 to K2"](#).

Komt u ook, eventueel met partner en kinderen ?

Als het niet past, vraagt u dan een collega/ ambtenaar te komen ?

Of spreekt u een ander (pers)moment met mij af vóór 30 juni ?

10 juni sta ik op [Huis & Energie](#) en 2 november presenteer ik "[mijn](#)" [Plan Duurzaam Sociaal NL op nationaal congres](#) (klik op Nijmegen). Dit Plan zit als PDF-document bij deze mail.

12 juni informeren we elkaar en borrelen we [op deze plek](#), circa 700m vanaf de Waco-glider Groesbeek.

U kunt er ook wandelen over heuvels die door gletsjers zijn gevormd. En vlakbij zijn streekproducten te koop, zoals asperges bij [Landwinkel Beijer Groesbeek](#).

Graag ontvang ik voor mijn expeditie een grote sticker van u. Eventuele sponsoring kan naar onderstaand banknummer.

Hartelijk bedankt en vriendelijke groeten, [REDACTED]

EXPEDITION BEAUTIFUL WORLD, sustainable social from 024 to K2

START For 30 years I am working with farmers, consumers and government on sustainable housing - food - planet. In 2022 I will do an Expedition Beautiful World. I want to highlight sustainable social projects from The Netherlands to Pakistan.

My purpose is to show:

- > real sustainable buildings & energy systems,
- > circular agricultural food production and
- > improvements to climate & social strenght.

I hope this will inspire government, banks, consumers and farmers to multiply the good things and leave the bad..... My companion is my LandRover Defender. Powered by fossil free diesel HVO100, made of waste from industry and restaurants. It is converted into an overland campervan by [PSP Expeditioncampers](#), drink-waterfilter from [Innologic](#) and maintained by [Autobedrijf Bisselink en Gerrits](#). I will walk and camp a lot on enormous glaciers of 50km long. >>> **Can you please publish this expedition or follow me?**

Projects that I want to visit are: **1. Plan Sustainable Social Netherlands**; fossil free heating with **PVT**-solarpanelsource for heatpump, so fields are kept for food production and for forests from which we built woodchip-houses (june 2022). Out of 30 years of experience with farmers, consumers and government, I made "my" Plan. PVT-panelsource convert light into power (PV) and the radiators at the back, extract heat (T) from the air. Also when it is dark and cold.

Sun-power and "air-heat" flow to the water-water-heatpump and so a little power is needed to heat your building and provide warm water.

Just half of the power and thus half of the solarfields will be necessary in comparison to the Climate Agreement. Which is counted with air-water-heatpump.

With PVT-systems on buildings, fields can be left to local farmers who can produce more sustainable food for people.

Read my complete Plan Sustainable Social NL on <https://www.linkedin.com/.../stemwijzer-stop-pv.../> .

Also visable on [Rijksoverheid Iedereen Doet Wat](#) Climate Suporter at pin Nijmegen.

For a house build in 1924 recently provided with PVT-solarpanelsource for heatpump, see: <https://duurzamehuizenroute.nl/.../hoekwoning-1924-nijmegen>

Plan Duurzaam Sociaal NL

gasloos verwarmen met PVT-zonpanelenbron voor water-water-warmtepomp

zodat akkers voor voedsel

en voor bos waaruit houtsnipperwoningen

2. Sustainable farms in Netherlands Gelderland (june 2022).

On [Horticulture De Lijsterbes](#), [Horticulture & Farmshop Beijer](#), dairyfarm & [Mini-camping De Hoge Hof](#) and day-care & [Ice-farm Foxhill](#), the farmers combine production of vegetables/dairy/ ice, day-care for older people, tourism and biodiversity.

3. Sustainable farms and biodiversity in Netherlands Brabant (june 2022).

In 1992 the ministry VROM made Policy on Housing, Spatial Planning and Environment (VINEX). Projects with farmers and consumers were to improve complete catchment areas of prior brooks (see green and brown areas on map). Results are sustainable food at #Hoefkens and #Langeboomseweg (Piet Bongers). And biodiversity around Hoge Raam, #TovenseBeek/ Anthonisbos with #TaurusOs, Esper Loop etc.

4. Less emissions from mature, with radiators of PVT in Belgium (july 2022).

We can see these solutions for climate proof stables at [R&R Systems B.V.](#) Pigfarm and

#KoeBoe.

5. Mountaineers and sustainability in Italy (july 2022).

Mountaineer & farmers like [Reinhold Messner](#), Stefano Ardito and others did a lot for sustainability and social strength on the world.

6. Sustainable farms in Croatia & Bosnia Dobro Dobrim (july 2022).

After war and earth quakes, [Dobro Dobrim DoDo](#) rebuilds houses and food production in a balance with the earth. Help from #4WDcare.

7. Biodiversity and food production in Albanië (july 2022).

In the #TethiNationalPark or with [Thethi-Guide](#) you can find a lot of biodiversity and organic food production. See also [Harrie Schouten Reizen](#) and [Further Adventures](#).

8. Sustainable farms, biodiversity and Mount Ararat in Turkey (aug 2022).

Here people built sustainable houses, food production and biodiversity. For example see [Intelligent Living Group](#) Hikmet Kaya.

9. Silk Routes and circulaire life in Iran Desert and Tatjikistan (aug 2022).

In these harsh areas, people live in a circulaire way. See https://youtu.be/d-7Jjv_HHSY of [GrizzlyNbear](#) or [Overland Aventure](#).

And https://youtu.be/JRq_d2UIB0g of Syncro Travels.

10. Trekking on glaciers in Pakistan Karakoram (aug 2022).

Between mountainpeaks up to 8.611 meters and over 60 km glaciers of (Hispar & Biafo and) Baltoro - basecamp K2 <https://youtu.be/BtZQI-ezICQ>.

I have solo-glacier-experience, so I prefer to go without porters. And will support them via [Nunatak](#), [Pakistan Land Rover Club](#), [Machulo Trek & Tours Pakistan](#).

11. Skills for people with disabilities in India Dunia Lulu.

This non-profit [Dunia lulu](#) raises money for schools and [Dunia lulu cafe](#), where people with disabilities get education or learn skills for work.
